

4.4 Number of triangles — quality and stability

Does increasing the triangle count improve final image quality?

Target: flag_100.png | Budget: 300 generations | Population: 30 | Selection: Elite | Crossover: One-point

Each dot is one run (seed). Box = middle 50%; line inside = median. Whiskers extend to observations within $1.5 \times \text{IQR}$; all runs are shown as dots. Lower boxes indicate better quality; shorter boxes indicate less variation.
