

4.4 Number of triangles — computational cost

How much computation does increasing the triangle count cost?

Target: flag_100.png | Budget: 300 generations | Population: 30 | Selection: Elite | Crossover: One-point

Each dot is one run (seed). Box = middle 50%; line inside = median. Whiskers extend to observations within $1.5 \times \text{IQR}$; all runs are shown as dots. Compare typical runtime and its spread.
